PRODENT is a multi-user network (Server-client) & Online based software to handle all the day to day operations of a multispecialty polyclinic. It has extensive features which make the operations of the clinic much easier than expected. As this is very extensive software we are not able to list all the features for your consideration but instead providing you with all the features in short that will give you some initial knowledge about the software. For in-depth features you are requested to arrange for a demonstration program which is free of any charges. The detailed features are as:

File Menu
