WEBLAB

WEBLAB Data Management software is a comprehensive Online Laboratory Information system. The software is a very simple and intuitive way to get more out of your testing equipment. WEBLAB online Data Management software provides test data results in report-ready format. This easy to use software provides powerful statistical analysis and reporting capabilities on any Microsoft Windows based personal computer. Built for purpose, our full-spectrum software portfolio encompasses Laboratory Information Management System as well as document management systems. We enable lab managers to automate and integrate their operations and cost-effectively manage samples and resources, capture and analyze quality data, provide essential reports and ensure regulatory compliance. The added advantage of WEBLAB is that it enables the customers to print their test reports conveniently from anywhere. No other company can offer more collective experience in managing the full scope of laboratory operations, from small single-purpose labs to complex integrations across global enterprises, and across the broadest range of industries. This easy to use software provides powerful statistical analysis and reporting capabilities on any Microsoft Windows based personal computers. For complete information on the product please feel free to contact us for a free demonstration program or call on +971 55 101 7383 for appointment.
